BLEEDING AND INFECTION

Each Lethal or aggravated injury causes bleeding. To staunch bleeding roll (Wits + Med.) difficulty equal to number of health-levels in the injury. Any strenuous activity will reopen staunched wounds. Whilst bleeding take one unsoakable lethal damage every Sta. minutes.

After suffering L or A wounds roll (Sta. + Res.) diff. 3 (more for bad conditions). If wound is reexposed before healing roll again. Success avoids infection. Failure causes disease, Morbidity 1 (increases by 1 each day untreated), -2 int. pen. on all non-ref. actions until cured. Treatment requires daily (Int. + Med.) rolls diff. equal to current Morbidity. Success stops morbidity from rising obviates need for further medicine rolls as long as treatment continues. Roll (Sta. + Res.) diff. of Morbidity daily. Success cures infection. On a botch or when the Morbidity rises above (Sta. + Res.) take a -4 internal pen. for Sta. days then die.

Dying Sta.

Steps in Combat:

1. Declare Attack
2. Declare Defense
3. Attack roll
4. Attack reroll
5. Subtract penalties/ Apply defenses
6. Defense reroll
7. Calculate raw damage
8. Apply hardness and soak then roll damage
9. Counterattack
10. Apply damage, knockdown, and stunning
